

About us

OmniDecor has been operating on the glass market for over twenty years. The undisputed leader in the acid etched glass sector, it develops premium products marketed all over the world. The Group boasts a wealth of creative, stylistic and production expertise which is constantly evolving thanks to its innovation and R&D activities.

Over the years, its close collaboration with companies, glassworks and the world of design and architecture has enabled OmniDecor to develop a manufacturing process distinctive for its broad flexibility and high quality standards. The OmniDecor glass production process begins with the customer: technical consultancy and the identification of materials on the basis of the characteristics requested, the careful selection of raw materials, the etching process, specific processes and the finish of the sheets, constant quality controls, the handling of logistical aspects, all of which focused on customer satisfaction.

OmniDecor provides multiple solutions in terms of size, colours and decoration of the glass sheets, and in terms of quality, performance and technical characteristics.

Glass for doors, glass for showers, glass for kitchens, glass for furniture, glass for furnishing accessories, glass for stairs, glass for floors, glass for walls, glass for façades and balustrades, glass for fitting out shops, glass for every need ...

The OmniDecor brands are synonymous with quality and refined design:

- DecorFlou: acid etched glass on one or both sides
- DecorFlou Design: glass decorated with patterns or textures
- DecorGem: enamelled glass with an etched or glossy finish
- DecorOpal: painted glass with an etched or glossy finish
- SolidLight: glass for light installations

Anti-slip glass and specialty glass complete the OmniDecor range.

OmniDecor's head office and production plant are located in Mosciano Sant'Angelo, Central Italy; its management, marketing and communication offices are in Mariano Comense, Northern Italy.
